

Shoham, Y. and Leyton-Brown, K., 2008, Multiagent Systems: Algorithmic, Game-Theoretic, and Logical Foundations, Cambridge University Press  
<http://www.masfoundations.org/mas.pdf>

(p.230, v. on line) “There are other large-population models that provide a more fine-grained model of the process, with many parameters that can impact the dynamics. We call such models, which **explicitly model the individual agents, agent-based simulation models.**”
