

jES, java Enterprise simulator, formerly jVE, java Virtual Enterprise, is a Swarm project aimed to simulate enterprises' (firms') behavior.

Look to the "How_to_use_jES.pdf" file contained in the last (upper number) .tar.gz distribution of jES in this folder.

Look also to `jve_swarmfest2001.zip` and to `jve_swarmfest2002.zip` in `old_stuff/` and to `jes_swarmfest2003.zip` here.
